

Nevada and Colorado **Gold** & **Silver** Opportunities

Q1 2022 Fact Sheet

Cherry Creek Project in Nevada.

Viscount Mining consolidated 20 former producing mines. Situated ~128 Km from Newmont's Long Canyon.

Viscount Mining did an earn-in agreement with Centerra Gold (Jan/21). Centerra has turned this into a district play. CGAU has about \$911M is cash and no debt.

Ex Chief Geo. of Newmont thinks Cherry Creek has excellent potential, pitting it against Long Canyon. NEM paid \$2.3B for Long Canyon in 2011.

Top Intercepts:

320 g/t Ag & 1.7 g/t Au over 174M	118 g/t Ag over 12M with a high assay of 506 g/t Ag
54 g/t Ag over 15M with a high of 133 g/t Ag	50 g/t Ag over 31M with a high of 247 g/t Ag

Silver Cliff Project in Colorado.

At their Silver Cliff Property in Colorado, they have historical (non-compliant) 110M oz of Silver

In 1987-1990, Tenneco Minerals did a historical resource est. (non compliant) on the **Kate Property** 50M oz Ag.

The **Passiflora Deposit** (CoCa Mines in 1983 generated a 65M oz historical resource est. (non compliant).

NI 43-101 (April/18): shows only **5.6M oz.** @ 84g/t Indicated + **7.1Moz** @ 70g/t Inferred. From 19 holes. Cutoff grade is 20 gpt silver.

Kate Deposit: Top Silver Intercepts:

230 g/t over 21 M	391 g/t over 14M	1700 g/t over 6M
762 g/t over 6M	403g/t over 11M	

702.7 g/t Ag @ 14.9m including 1,259.1 g/t Ag @ 7.6m - a 57.9m foot step out.

Silver Oxide at **Surface to ~50m**. Shallow, open pit-able, disseminated - drilling to expand the resource.

Tenneco Minerals did a PFS for an open pit & were to spend \$35M for a mill in 1991, when Tenneco's parent company was taken over and the deal fell apart.

The Passiflora has the same geological setting as Newmont's Cripple Creek 48 km away which produced 322K oz in 2019.

Geological mapping suggests that the polymetallic resource maybe a combo of epithermal veins and a CRD.

Catalysts

1) Silver Cliff ,Colorado

Drill results. **Expand/update the 43-101 Q3**

Proving concept that it has the potential to be one of the largest silver deposits in the continental U.S.A.

2) Cherry Creek, Nevada

Expect news on drilling and drill results throughout 2022.

Centerra would benefit greatly from Cherry Creek to diversify out of Kyrgystan.

M&A Target, IMO.
